DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation in the last line of claim 1 "the Y' axis" lacks an antecedent basis. It is unclear whether Y' axis is properly recited as to final axis that rotated about. It is noted that when the plate first rotates about Z axis, the Y. axis becomes Y' axis and when the second rotation about X' axis, the Y' axis becomes Y'' axis. Finally, the third rotation is about Y'' axis thus the plate has sides parallel to an X'' axis and a Z'' axis. In order to clarify the scope of the claim, Y family axes (Y, Y' and Y'' axis) should be clearly recited in the claim.
